

**Math 133, Section 42**  
**Spring 2008**

Aaron Marcus  
Office: Eckhart 17  
E-mail: amarcus@math.uchicago.edu  
Web Page: <http://math.uchicago.edu/~amarcus/>

**Office Hours:** 1:30-3:00 W/Th, and by appointment

**Teaching Assistants:** Daniel Donohue (P022) , Michelle Lee (E133)

**Tutorials:** 12:00-1:20 TTh

**Text:** Calculus and Analytic Geometry by Varberg and Purcell

**General Policy:** There will be two in-class tests, each worth 20% of your grade, and a final exam, worth 40%. The remaining 20% of your grade will consist of homework and quizzes. Homework will be assigned in one class period and due in the next, while quizzes will be generally be given in tutorial. You should feel free to work on homework together, but you should write up your solutions independently. The course (but not individual tests) will be slightly curved, so while ideally 90% will be an A, 80% a B, 70% a C, and 60% a D, there may be the equivalent of a 5-10% boost to grades before letter grades are assigned.

**Important dates:**

Midterm 1: Friday, April 25 (Week 4)

Midterm 2: Friday, May 23 (Week 8)

Final exam: Monday, June 9, 10:30-12:30

It is the policy of the Department of Mathematics that the following rules apply to the final exam in all undergraduate mathematics courses:

1. The final exam must occur at the time and place designated on the College Final Exam Schedule. In particular, no final examinations may be given during the tenth week of the quarter, except in the case of graduating seniors.
2. Any student who wishes to depart from the scheduled final exam time for the course must receive permission from Paul Sally (office is Ry350, phone is 2-7388, email is sally@math.uchicago.edu). Instructors are not permitted to excuse students from the scheduled time of the final exam except in the cases of an Incomplete.

**Miscellaneous Items of Interest:**

Incompletes are rarely given, and only for cases of extreme personal tragedy. I will almost never give a make-up exam.
