MATH 277, AUTUMN 2019

First quarter of the Mathematical Logic sequence.
Tuesdays and Thursdays, 12:30-1:50pm, Eckhart 202.

Course instructor: M. Malliaris
Eckhart 406, mem@math.uchicago.edu.
Office hours: to be announced.

Course assistant: G. Pinto, gabriela@math.uchicago.edu
Office hours, problem session: to be announced.

Class website: http://math.uchicago.edu/~mem/277.html

Suggested references:

Grading scheme:
• 35% homework, see below.
• 25% midterm, in-class on Tuesday, October 29 (Tuesday of fifth week).
• 40% Final Exam, 1:30-3:30pm on Tuesday, December 10.

*Homework will be assigned in class on most Tuesdays and will be due the following Monday at 4pm in Pinto’s mailbox in the basement of Eckhart, unless stated otherwise on the assignment. No late homework will be accepted. We will automatically drop the lowest homework score when computing the overall homework grade. You are welcome to discuss the assignments with others in the class, but you should write up solutions independently and state with whom you worked.

If your final exam score is better than your midterm score, we will replace the midterm score with the final exam score when computing your final class average. Because of this policy, no make-up midterms will be given.

The final exam policy, below, is set by the Department of Mathematics.

Final Exam: Tuesday, December 10, 1:30-3:30pm, location to be determined.

**Final Exam Policy**

It is the policy of the Department of Mathematics that the following rules apply to final exams in all undergraduate mathematics courses:

• The final exam must occur at the time and place designated on the College Final Exam Schedule. In particular, no final examinations may be given during the tenth week of the quarter, except in the case of graduating seniors.

• Instructors are not permitted to excuse students from the scheduled time of the final exam except in the cases of an Incomplete, or a graduating senior.
