MATH 277, AUTUMN 2017

First quarter of the Mathematical Logic sequence.
Tuesdays and Thursdays, 12:30-1:50pm, Eckhart 202.

Course Instructor: M. Malliaris
Eckhart 406, mem@math.uchicago.edu.
Office hours: to be announced.

College Fellow: S. Reitzes
Eckhart 17, sreitzes@math.uchicago.edu
Office hours, problem session: to be announced.

Class website: http://math.uchicago.edu/~mem/277.html

Suggested references:
Chang and Keisler, Model Theory, third edition (Dover).

Grading scheme:
- 35% homework, see below.
- 25% midterm, in-class on Tuesday, October 17 (Tuesday of fourth week).
- 40% Final Exam, 1:30-3:30pm on Thursday, December 7.

Homework will be assigned in class on most Tuesdays and will be due the following Monday before 5pm in the course mailbox in the basement of Eckhart, unless stated otherwise on the assignment. No late homework will be accepted. We will automatically drop the lowest homework score when computing the overall homework grade. You are welcome to discuss the assignments with others in the class, but you should write up solutions independently and state with whom you worked.

Please speak to me as soon as possible, and no later than October 5th, if you anticipate an unavoidable conflict with the date of the midterm. The final exam policy, below, is set by the Department of Mathematics.

Final Exam: Thursday, December 7, 1:30-3:30pm, location to be determined.

Final Exam Policy

It is the policy of the Department of Mathematics that the following rules apply to final exams in all undergraduate mathematics courses:

- The final exam must occur at the time and place designated on the College Final Exam Schedule. In particular, no final examinations may be given during the tenth week of the quarter, except in the case of graduating seniors.
- Instructors are not permitted to excuse students from the scheduled time of the final exam except in the cases of an Incomplete, or a graduating senior.
