

# On The Night After Hanukkah

by Ucaoimhu

'Tis the season for random frolicking. In particular, as you enter each of the Down answers, one letter (the same letter in each) will unexpectedly move. (Enumerations on the clues refer to the answer before alteration; one of the altered grid entries is a two-word phrase.) One third of the Across clues work normally; their answers, in clue order, will tell you loud and clear what these moving letters are. The remaining Across clues each have an extraneous letter, which must be removed before solving; these letters, in clue order, will tell you how the moving letters have been additionally displaced.
